Basic Principles of Curriculum and Instruction Ralph W. Tyler,2013-08-09 The acclaimed classic shows educators how to set classroom objectives, select learning experiences, organize instruction, and evaluate progress. In 1949, a small book had a big impact on education. In just over one hundred pages, Ralph W. Tyler presented the concept that curriculum should be dynamic, a program under constant evaluation and revision. Curriculum had always been thought of as a static, set program, and in an era preoccupied with student testing, he offered the innovative idea that teachers and administrators should spend as much time evaluating their plans as they do assessing their students. Since then, *Basic Principles of Curriculum and Instruction* has been a standard reference for anyone working with curriculum development. Although not a strict how-to guide, the book shows how educators can critically approach curriculum planning, studying progress and retooling when needed. Its four sections focus on setting objectives, selecting learning experiences, organizing instruction, and evaluating progress. Readers will come away with a firm understanding of how to formulate educational objectives and how to analyze and adjust their plans so that students meet the objectives. Tyler also explains that curriculum planning is a continuous, cyclical process, an instrument of education that needs to be fine-tuned. This emphasis on thoughtful evaluation has kept *Basic Principles of Curriculum and Instruction* a relevant, trusted companion for over sixty years. And with school districts across the nation working feverishly to align their curriculum with Common Core standards, Tyler's straightforward recommendations are sound and effective tools for educators working to create a curriculum that integrates national objectives with their students' needs. Praise for *Basic Principles of Curriculum and Instruction* "Tyler addresses the essential purposes of teaching in a way that still has relevance for contemporary students of education, and communicates to them how important and timeless the quality of the pupil-teacher interaction actually is." —Times Higher Education (UK)

Curriculum Development Daniel Tanner,Laurel N. Tanner,1995 With its focus on the application of theory to actual classroom practice, this book's treatment of the full spectrum of curriculum design and practice has set the standard for completeness for nearly two decades. Part I explores the historical roots of current curriculum issues and practices,

emphasizing the assessment of leading efforts at reform. Part II offers a critique of changing concepts of curriculum, conflicting curriculum and educational rationales, and influences for and against change. In Part III, major crosscurrents in reform and reconstruction are discussed, including social crises, the knowledge explosion, curriculum articulation, and emerging designs. Part IV focuses on curriculum research and improvement, paying particular attention to the roles of teachers, supervisors, administrators, and curriculum specialists in the process.

Curriculum Theory George A. Beauchamp, 1981

Curriculum and Imagination James McKernan, 2007-08-07 Curriculum and Imagination describes an alternative 'process' model for designing, developing, implementing and evaluating curriculum, suggesting that curriculum may be designed by specifying an educational process which contains key principles of procedure. This comprehensive and authoritative book: offers a practical and theoretical plan for curriculum-making without objectives shows that a curriculum can be best planned and developed at school level by teachers adopting an action research role complements the spirit and reality of much of the teaching profession today, embracing the fact that there is a degree of intuition and critical judgement in the work of educators presents empirical evidence on teachers' human values. Curriculum and Imagination provides a rational and logical alternative for all educators who plan curriculum but do not wish to be held captive by a mechanistic 'ends-means' notion of educational planning. Anyone studying or teaching curriculum studies, or involved in education or educational planning, will find this important new book fascinating reading.
