Diego Marconi

Lexical Competence Diego Marconi,1997 Proposes a dual picture of human lexical competence in which inferential and referential abilities are separate. Topics discussed in the text include classical issues in the philosophy of language and philosophy of mind such as semantic holism, dual-factor theories, publicness, and verificationism.

Teaching and Learning Vocabulary Elfrieda H. Hiebert,Michael L. Kamil,2005-05-06 Although proficiency in vocabulary has long been recognized as basic to reading proficiency, there has been a paucity of research on vocabulary teaching and learning over the last two decades. Recognizing this, the U.S. Department of Education recently sponsored a Focus on Vocabulary conference that attracted the best-known and most active researchers in the vocabulary field. This book is the outgrowth of that conference. It presents scientific evidence from leading research programs that address persistent issues regarding the role of vocabulary in text comprehension. Part I examines how vocabulary is learned; Part II presents instructional interventions that enhance vocabulary; and Part III looks at which words to choose for vocabulary instruction. Other key features of this timely new book include: *Broad Coverage. The book addresses the full range of students populating current classrooms--young children, English Language Learners, and young adolescents. *Issues Focus. By focusing on persistent issues from the perspective of critical school populations, this volume provides a rich, scientific foundation for effective vocabulary instruction and policy. *Author Expertise. Few volumes can boast of a more luminous cast of contributing authors (see table of contents). This book is suitable for anyone (graduate students, in-service reading specialists and curriculum directors, college faculty, and researchers) who deals with vocabulary learning and instruction as a vital component of reading proficiency.

Communicative Competence Sandra J. Savignon,1997 Stressing the use of meaningful language at all stages of language acquisition, this work is about texts and contexts in second language learning. It is intended for teachers and teachers-in-training as an introduction to the theoretical basis for communicative language teaching and as a guide to building a program consonant with those theories.

Aspects of Language Teaching H. G. Widdowson,1990-04-19 This volume critically reviews the most prominent issues in language teaching today and relates them to general perspectives on the nature of language and of language teaching and learning.

Academic Controversy David W. Johnson, Roger T. Johnson, Karl A. Smith, 1996-05-15 This book is about using conflict to create student involvement in learning, intellectual curiosity, intrinsic motivation to learn, higher achievement and higher level reasoning. Conflict is the heart of all drama, a major tool for capturing interest and attention. If students are to learn and master the procedures and skills required for managing intellectual conflicts constructively, they must do so in the classroom.

Interfaces Between Second Language Acquisition and Language Testing Research Lyle F. Bachman, Andrew D. Cohen, 1998 Second language acquisition (SLA) and language testing (LT) research have largely been viewed as distinct areas of inquiry in applied linguistics. This book provides a fresh look at areas of common interest to both SLA and LT research, and ways in which research in these two areas of applied linguistics can be fruitfully integrated.
